

EKO CAR PROTECTION PRODUCTS

EKO SUMMER SCREENWASH,

EKO WINTER SCREENWASH -20°C.

EKO SUMMER SCREENWASH and EKO WINTER SCREENWASH -20°C are ready to use windscreen, headlight and car window cleaners. They effectively remove all traces of dirt, salts and dust, as well as insect residues, leaving the surfaces clean and shiny without damaging the windscreen wipers or seals. They soften hard deposits, making the work of wipers easier.

EKO SUMMER SCREENWASH is specially designed to meet the needs of the car in the warmer months of the year, when anti-freeze protection is not required. EKO WINTER SCREENWASH -20°C is designed to meet the needs of the car during the colder months of the year, and its special composition provides anti-freeze protection against temperatures as low as -20°C.

Deionized Water

High purity deionized water, suitable for use in automotive batteries and coolers, chemical analysis laboratories, steam irons, etc.
